Education

Bachelor of Computer Science

September 2022 - August 2025

Palacký University Olomouc, Czech Republic

With a specialisation in programming and software development.

Business High School

September 2016 - July 2021

Bilingual Business Academy EDUCO, Slovakia

With a specialisation in English and accounting.

Projects

Automatontron

<https://github.com/ZuZanaZZ/Automatontron>

Designed and developed a logic game in Python using Pygame, based on automata theory.

Utilised OOP principles and the Strategy design pattern to write maintainable code.

Created all graphics, sound effects, and music.

Portfolio Website

<https://github.com/ZuZanaZZ/Portfolio-website>

Developed a responsive website with a focus on semantic HTML and accessibility. Used CSS for styling.

Skills

Python: Game development using Pygame.

C#: Web application development using ASP.NET.

C: Implementation of algorithms and data structures.

Assembly: Low-level programming and understanding of computer architecture.

Common Lisp : Exploration of functional, object-oriented, logic, and parallel programming paradigms.

HTML and CSS: UI design and website implementation.

SQL: Database design and querying.

Summary

I graduated with a Bachelor's degree in Computer Science. I have an interest in automata, algorithms, and niche programming languages. I'm particularly familiar with Python, Common Lisp, and C#. I would like to settle down in Denmark, where my partner lives.

Courses

Mathematics

- Linear Algebra
- Discrete Structures
- Calculus

Programming

- Programming Paradigms
- Software Engineering
- Database Systems

Theoretical Computer Science

- Algorithms
- Formal languages and Automata
- Computability and Complexity

Graphics and Modeling

- 3D Printing
- Computer Graphics

Hobbies

Knitting	Exercise	Running
Crochet	Baking	Gardening
Sewing	Journaling	Coffee
Painting	Gaming	Piano

Languages

Slovak: Native

English: State exam, C1 level
